

Project Profile

Sector: Contaminated Land

Project: Training on Reviewing Consultants Reports

Client: East Riding of Yorkshire Council

Period: November 2000

The East Riding of Yorkshire Council commissioned LQM to develop and deliver a one day training package on reviewing consultants reports with respect to contaminated land issues.

The training was aimed at delegates within the Local Authority who routinely review and comment on consultants reports as part of the planning process or the Part IIA regime. The one day course was delivered to the twenty delegates at a venue organised by the client.

Topics covered included

- Reviewing Phase 1 reports – what information should be included, designing a walkover study
- Reviewing Phase 2 reports – designing a site investigation, analysing laboratory data, using generic assessment criteria, deriving site specific assessment criteria and evaluating risks to human health.

The delegates actively participated in a number of group based exercises.
