## Project Profile

- Sector:** Landfill gas, expert witness
- Project:** Proof of evidence on landfill gas management, Bairds Brae landfill, Newtownabbey, Co. Antrim, N. Ireland
- Client:** UK Waste Management Ltd
- Period:** May 2000 – September 2000

Dr Bob Gregory of LQM was invited by UK Waste to act as an expert witness for UK Waste in a civil case alleging negligence in the management of their Bairds Brae landfill site from the time of commencement of their operations to the present day, and nuisance caused by odour and other factors.

A proof of evidence was drawn up which considered the planning, engineered construction, operation, landfill gas monitoring and management of the site on a cell by cell basis, which actually demonstrated the management systems applied to the site were to current best practice, and in some cases better than that required by Waste Management Paper 27: Landfill Gas.

The plaintiffs withdrew their claim for nuisance and negligence five days before the hearing was scheduled to take place.
