

User Feedback on the 2nd Edition – LQM/CIEH Generic Assessment Criteria for Human Health Risk Assessment

Following the publication of the 2nd Edition in July 2009, LQM has received a good deal of feedback and there has been discussion in relevant forums

“It’s a very good example of cross-sector self-help ... We expect that these values will quickly become the numbers of choice in both the public and private sectors. Relevant, appropriate, authoritative and scientifically based, they can be used with confidence and employed properly, we believe they will meet an important need in the risk assessment process.” (Howard Price, CIEH) (Contaminated Land News, August 2008)

‘We have received our copy of the new LQMCIEH document and a big thank you to Paul and the rest of the workshop for producing such a comprehensive document.’ (Consultant)

‘First reaction is that it’s a massive very detailed document well worth the price and 80 odd new numbers to use!!!’ (Local Authority)

“Really pleased to hear they have done both CrIII & CrVI.” (Consultant)

“There is an interesting comparison of the GACs and SGVs for phenol and cadmium as the SGVs were released shortly before publication of the LQM document.” (Local Authority)

“We’ve just received our copy of the report - see you all in 4 months time when I’ve had chance to read it cover to cover!!!” (Consultant)

‘Believe it or not, we’re actually looking forward to reading it!’ (Consultant)

“I’d be most interested to hear the thoughts of fellow subscribers on the ‘low’ ‘residential’ benzo(a)pyrene GAC (@ 1% SOM) provided within the LQM/CIEH 2nd edition document” (Consultant)

... *“It is what it is, it is a fact that BaP is toxic and some facts are inconvenient.”* (Local Authority)

... *“The proposed GAC does cause issues, but then if the site model is understood and can be refined then this should be incorporated ... there is no point shooting any messengers”* (Consultant)

If you would like to provide your own comments or feedback on the publication then please email your comments to: administrator@lqm.co.uk. Please enter **GAC feedback** as the subject header.
